# Boris Nikiforov

## FULL STACK WEB DEVELOPER

After almost two decades of working in video and audio production, I joined the world's leading web development bootcamp called - Le Wagon, in Istanbul. During the bootcamp I developed a strong preference for backend development. It feels more logical and somehow more powerful! I build three web applications and completed over 300 coding challenges. With my new knowledge, I'm looking for job opportunities as a Junior Full Stack Software Developer.
